-
- (1) This table is a distributional analysis of the proposal in revenue table JCX-54-17, excluding the following sections under I. Tax Reform for Individuals: B.2.b., B.3.d., C.2., C.3., E.1.- E.6., F.1 - F.6., and G.
- (2) The income concept used to place tax returns into income categories is adjusted gross income (AGI) plus: [1] tax-exempt interest, [2] employer contributions for health plans and life insurance, [3] employer share of FICA tax, [4] worker's compensation, [5] nontaxable Social Security benefits, [6] insurance value of Medicare benefits, [7] alternative minimum tax preference items, [8] individual share of business taxes, and [9] excluded income of U.S. citizens living abroad. Categories are measured at 2017 levels.
- (3) Federal taxes are equal to individual income tax (including the outlay portion of refundable credits), employment tax (attributed to employees), excise taxes (attributed to consumers), and corporate income taxes. The estimates of Federal taxes are preliminary and subject to change. Individuals who are dependents of other taxpayers and taxpayers with negative income are excluded from the analysis. Does not include indirect effects.
- (4) The average tax rate is equal to Federal taxes described in footnote (3) divided by income described in footnote (2).
- (5) For returns in the \$10,000 to \$20,000 income category, Federal taxes would decrease from -\$2.412 billion to -\$4.453 billion.

- (1) Includes nonfilers, excludes dependent filers and returns with negative income.
- (2) The income concept used to place tax returns into income categories is adjusted gross income (AGI) plus: [1] tax-exempt interest, [2] employer contributions for health plans and life insurance, [3] employer share of FICA tax, [4] worker's compensation, [5] nontaxable Social Security benefits, [6] insurance value of Medicare benefits, [7] alternative minimum tax preference items, [8] individual share of business taxes, and [9] excluded income of U.S. citizens living abroad. Categories are measured at 2017 levels.
