

# A Look at ChatGPT

By Don Sutherland

OpenAI is currently providing public access to its ChatGPT Artificial Intelligence (AI) tool. The tool is a language model that generates text in response to prompts. In time, the tool will likely have a wide range of applications including the preparation of training materials, responses to frequently asked questions, and perhaps even helping writers address “Writer’s Block” or find new angles to their work.

The system has strengths, but it also has some limitations. In developing short stories, it seems unable to provide the depth of character descriptions that make well-developed characters memorable. It is not able to consistently produce Haiku within the 5-7-5-syllable structure. It often concludes passages with advice to the reader(s).

To start, I asked ChatGPT to tell me what it is and how it can be helpful. ChatGPT replied:

*ChatGPT is a large language model trained by OpenAI that can generate human-like text based on a given prompt. This can be useful for a variety of applications, such as generating responses to customer inquiries in a chatbot, or for creating automated content for social media or websites.*

*Some potential benefits of using ChatGPT include:*

- *Generating high-quality, natural-sounding text that can be used in a variety of applications*
- *Providing quick and efficient responses to customer inquiries or other queries*
- *Offering a scalable solution for generating large amounts of content*
- *Allowing users to customize the generated text by providing specific prompts or constraints.*

*Overall, using ChatGPT can help improve the efficiency and accuracy of text generation tasks, while also providing a more natural and human-like output.*

I then further tested the system. The prompts are in bold-face type. ChatGPT’s responses are italicized.

## **Explain the value of homework:**

*Homework has many benefits that can help students learn and retain new information, develop good study habits and time management skills, and prepare them for the next lesson or unit of study. Homework can also be a valuable tool for reinforcing concepts and skills that were taught in class. By completing homework assignments, students have the opportunity to apply what they have learned in a practical setting, which can help them understand the material more deeply. Additionally, homework can help students develop important skills such as problem-solving, critical thinking, and independent learning. These skills are essential for success in school and in the workplace. Furthermore, homework can help students develop good study habits, such as*

*setting aside a dedicated time and place for studying, which can be beneficial for their overall academic performance.*

**Who is an example of a great leader and why?**

*One example of a great leader is Mahatma Gandhi. Gandhi was a political and spiritual leader in India who was known for his philosophy of non-violent resistance. He was a key figure in the Indian independence movement and played a crucial role in achieving independence for India from British rule. Gandhi was a great leader because he was able to inspire and mobilize millions of people through his vision of non-violence and social justice. He was also a powerful and effective communicator, able to connect with people from all walks of life. Additionally, Gandhi was a courageous and steadfast leader, willing to stand up for his beliefs and face opposition, even at great personal cost. These qualities made him a powerful and transformative leader, and his legacy continues to inspire people around the world.*

**Leonardo da Vinci explained, "It had long come to my attention that people of accomplishment rarely sat back and let things happen to them. They went out and happened to things." What do you think?**

*I think Leonardo da Vinci's statement is accurate. People who are successful and accomplished often have a proactive approach to life, rather than simply reacting to things as they happen. They take initiative and make things happen, rather than waiting for opportunities to come to them. This approach can lead to a greater sense of control over one's life and can help people achieve their goals and dreams.*

**Write a poem about change:**

*Change is a force that's always on the move  
It can be gentle, like a breeze on a warm summer's day  
Or it can be fierce, like a storm that rages on and on  
But whether it's gentle or fierce, change is a constant in our lives  
It shapes and reshapes the world around us  
And it forces us to adapt and grow  
We can resist change, and try to hold on to the familiar  
But eventually it will come for us, like a river that flows  
And we must learn to navigate its currents and embrace its power  
For in change, there is opportunity  
To learn and to grow, to explore and to discover  
To become something new, something better, something more  
So let us embrace change, and let it guide us on our journey  
For it is the engine of progress, and the path to a brighter future.*

**Complete the paragraph starting with, "The weary climber reached the summit as daylight was fading and evening's shadows loomed. From the top of the towering mountain..."**

*The weary climber reached the summit as daylight was fading and evening's shadows loomed. From the top of the towering mountain, she could see the world below her, a vast and beautiful expanse of rolling hills, forests, and lakes. She felt a sense of awe and wonder at the sight, and she knew that she would never forget this moment. She had climbed this mountain to challenge herself, to push her limits, and to see the world from a new perspective. And now, as she gazed out at the horizon, she felt a sense of accomplishment and pride. She had made it to the top, and nothing could take that away from her. She pulled out her camera and snapped a few photos to remember the moment, before starting her descent back down the mountain.*

### **What is ChatGPT's future?**

It seemed to misfire, explaining, "I do not have the ability to browse the internet." I asked it to "try again." It then ventured:

*In the future, it is likely that ChatGPT and other language models will continue to improve and become even more sophisticated. This could involve training on larger and more diverse datasets, as well as the development of new algorithms and techniques for generating text.*

*Additionally, there may be new applications and uses for ChatGPT and other language models as they continue to evolve. For example, they could be used in more complex tasks such as machine translation, summarization, or even creative writing.*

*Overall, the future of ChatGPT and other language models is uncertain, but it is likely that they will continue to play a significant role in a variety of applications.*

**Bye.**

*Goodbye! I hope you have a great day. Let me know if you have any other questions or need any further information. I am here to assist you to the best of my ability.*
